SOFT DRINKS

PHOSPHATES / 6

Created in 1868 as an invigorating health tonic, Acid Phosphate became a key ingredient in sodas because it enhanced the flavor of drinks due to small amount of various salts; potassium, calcium and magnesium and its pleasant acidity. The phosphate drink was the most popular drink at soda fountains for over 70 years and we honor that classic tradition by blending our own house-made syrups, Extinct Chemical Company's acid phosphate and chilled soda water. We offer the following flavors: **Ginger, Raspberry, Pineapple, Strawberry, Prickly Pear, Passion Fruit, Pomegranate**

We suggest you add 2oz of your favorite spirit from our list to make it a boozy soda!

EGG CREAMS / 7

Containing no eggs, this NYC soda fountain classic that has been around since the 1880s, loving the original inspired us to create our own variations around the simple formula of: flavored milks and creams deliciously lengthened with chilled soda water straight from the tap.
